

Nechama Eisenstein

Software Engineer

np3250839@gmail.com | 058-3250839 | [GitHub](#) | [linkedin](#) |

PROFILE

Quick understanding ,excellent self-study ability, high work ethic, highly motivated and excellent human relations.

EXPERIENCE

Red Hat – Software Development Practicum | 2025 –2026

Joined the **Pendrive team**, which develops a diagnostic tool that runs validation rules on **production OpenShift clusters** and generates shareable HTML and JSON reports.

- Implemented a **user-friendly HTML report generator** aligned with Red Hat design standards, replacing a basic existing solution.
- Designed a **modular architecture** separating logic from HTML code using Python objects and **Jinja2** templates, macros and template inheritance to have a clean structured code without duplications.
- Developed a **Python adapter** that converts rule-result JSON into structured models, supporting multiple rule types and enabling consistent analysis across diagnostic sessions.
- Built an **offline diagnostic report UI** using Web Components and PatternFly (Red Hat design system).
- Implemented a **Python workflow that processes JSON inputs and generates structured HTML reports** used by Red Hat teams and customers in production environments.
- Collaborated through **GitHub-based development**, including pull requests and code reviews by experienced Red Hat engineers.

Jerusalem Municipality – Education Department (2022–2026)

- Managed large educational datasets to support placement decisions.
 - Collaborated with ministries, principals, and parents on complex student cases.
 - Ensured compliance with municipal and regulatory documentation standards.
-

EDUCATION

Advanced Diploma in Software Engineering

Institute for Technological Training (MAHAT), Jerusalem | 2023–2026

- Core studies: advanced studies in computer science (at an academic level).

Graduated with honors.

- Additional courses: Algorithmic, Databases, Data Structure, Operating Systems, Software Engineering

- **Average: 96**

Automation & AI Systems

Kedem Campus | 2025

TECHNICAL SKILLS

- **Languages:** Python, C#, Java, JavaScript, TypeScript, C, C++
 - **Frontend:** Angular, React
 - **Backend:** Node.js, .NET
 - **Databases:** SQL
 - **Tools & Automation:** Git, Jinja2, Make/Integromat, Zoho, Powerlink, OpenAI API
-

PROJECTS

[Smart Learning System](#) (React + C# + LLM Integration)

- Developed an AI-powered assistant using OpenAI's LLM (GPT) for context-aware responses.
- Built a **React** frontend and **C#** backend to manage **API integration** and business logic.
- Designed the system from scratch, enabling intelligent, free-text student interactions.
